EDUCATION

American University of Armenia (AUA)
Bachelor of Science in Computer Science
Capstone: Methods for Armenian Epigraphic Inscription Recognition

- Track: Mathematical Modeling
- Noubar Afeyan Foundation Grant

Yerevan, Armenia
August 2021 – June 2025

EXPERIENCE

Align Technology
Machine Learning Engineer
Machine Learning Intern

Yerevan, Armenia
July 2025 – Present
July 2024 – June 2025

- Train detection and classification models on low-resource datasets; achieved over 90% accuracy.
- Improve the OCR pipeline using deep learning methods; fine-tuned a transformer-based model that reached 99.7% character-level accuracy.
- Conduct end-to-end pipeline analysis to diagnose errors, measure performance, and identify bottlenecks across data ingestion, preprocessing, and inference.
- Automate preprocessing workflows to support model improvement and reduce manual intervention.

AUA College of Science and Engineering (AUA CSE)
Junior Researcher
Student Researcher

Yerevan, Armenia
June 2025 – Present
March 2025 – May 2025

- Currently working on deep learning approaches for inscription recognition, with a focus on detection, segmentation, and robust character recognition.
- Developed a machine learning-based OCR pipeline for images of highly eroded and noisy Armenian inscription writings. Capstone presentation waived based on the strength of the research paper, which was accepted as a sufficient demonstration of contributions in Armenian inscription OCR.
- Supervised by Dr Suren Khachatryan.

CERTIFICATES

MIT's MISTI Program at AUA
Participant

Yerevan, Armenia
Seasonal, Winters 2022 - 2023

- An intensive workshop about radiation and its applications by the leading professor of MIT in Nuclear Engineering
- It included a practical part during which I built my own Geiger Counter using the MIT NSE design
- Lead by Dr Areg Danagouljan.

Harvard University's CS50

ONLINE
Summer 2023

- Deep diving into various areas of computer science and applying in practice specific concepts, such as data structures, resource management, and security
- The course concentrates on widely applicable concepts but also includes more complex low-level languages, such as C, and their features

MIT's Nuclear Detection Course

Yerevan, Armenia
Summer 2022

- Continuation of an earlier workshop. I have worked with a new design of a Geiger Counter and enhanced it by making it more compact, adding and coding a data display. Lead by Dr Areg Danagouljan.

PUBLICATIONS & HONORS

Afeyan Foundation Research Grant for Armenian stone inscription OCR	2025
AUA CSE Research Showcase placed 4th out of 60	2025
Nersesian et al., <i>Advancing Armenian Inscription Recognition. Digital Heritage 2025. Accepted.</i>	2025
Nersesian et al., <i>Inscription Recognition Using Transformers. In review.</i>	2025

SKILLS

- Languages:** Russian (native), English (fluent), Armenian (advanced)
- Coding & Data:** Python, C, R, SQL, pandas, numpy, scikit-learn
- ML & CV:** opencv, pytorch, tensorflow, CUDA, MLflow
- Tools & Platforms:** Git, DVC, AWS (EC2, S3, SageMaker), Docker, Splunk
